

IMPROLITY

PROJECT

## *The* Software for Portfolios

Improliity Project enables organisations to easily take control of their daily project and portfolio management needs.

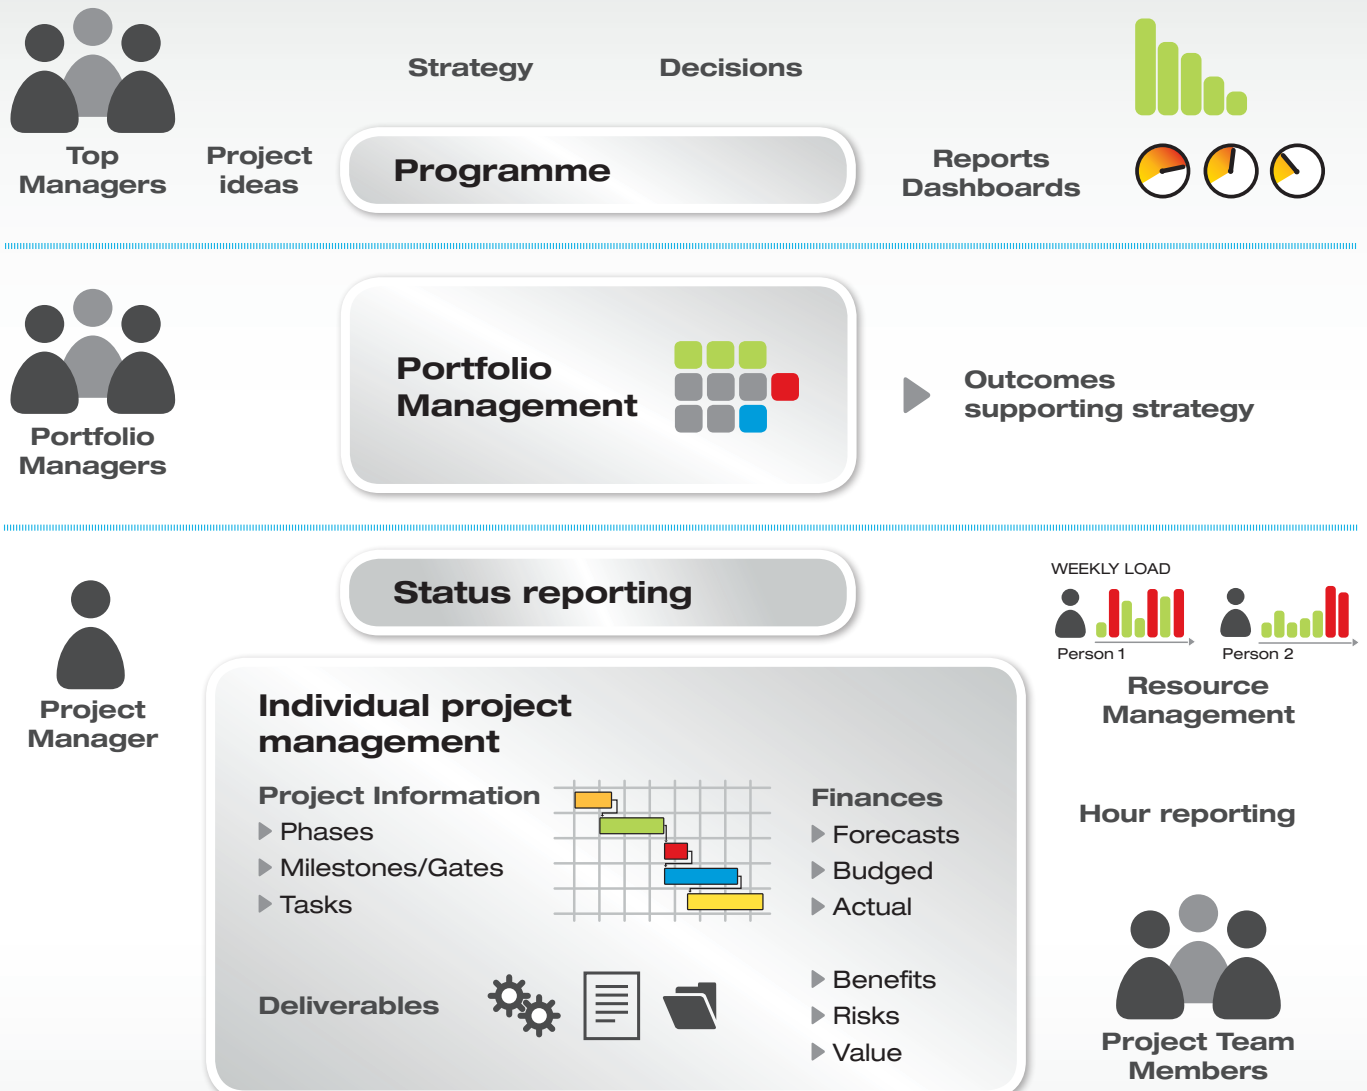

[www.improliity.com](http://www.improliity.com)

# Project Management Overview

The primary challenge of project management is to achieve all of the project goals and objectives while honouring the preconceived project constraints. Typical constraints are scope, time and budget. The secondary—and more ambitious—challenge is to optimise the allocation and integration of inputs necessary to meet pre-defined objectives.

## Take control of your Projects & Portfolios

**Improliity Project** enables organisations to easily take control of their daily project and portfolio management needs. As the demand for change is real, all organisations looking into the future require an efficient, easy-to-use and feature rich solution to cover all aspects of project portfolio management. Leading organisations in all industries have realised that controlling projects' finances and deadlines, require powerful tools like **Improliity Project**. Also managing human resources well and controlling the whole project portfolio efficiently is increasingly important.

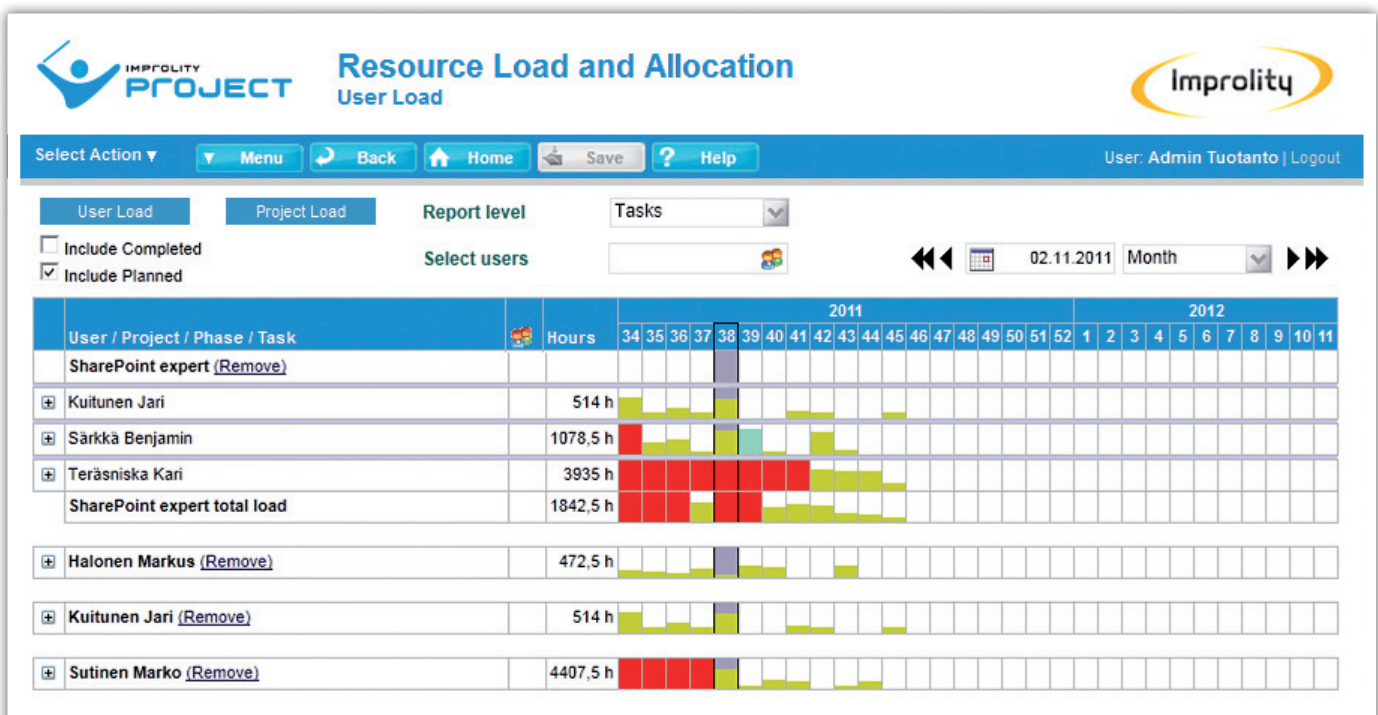

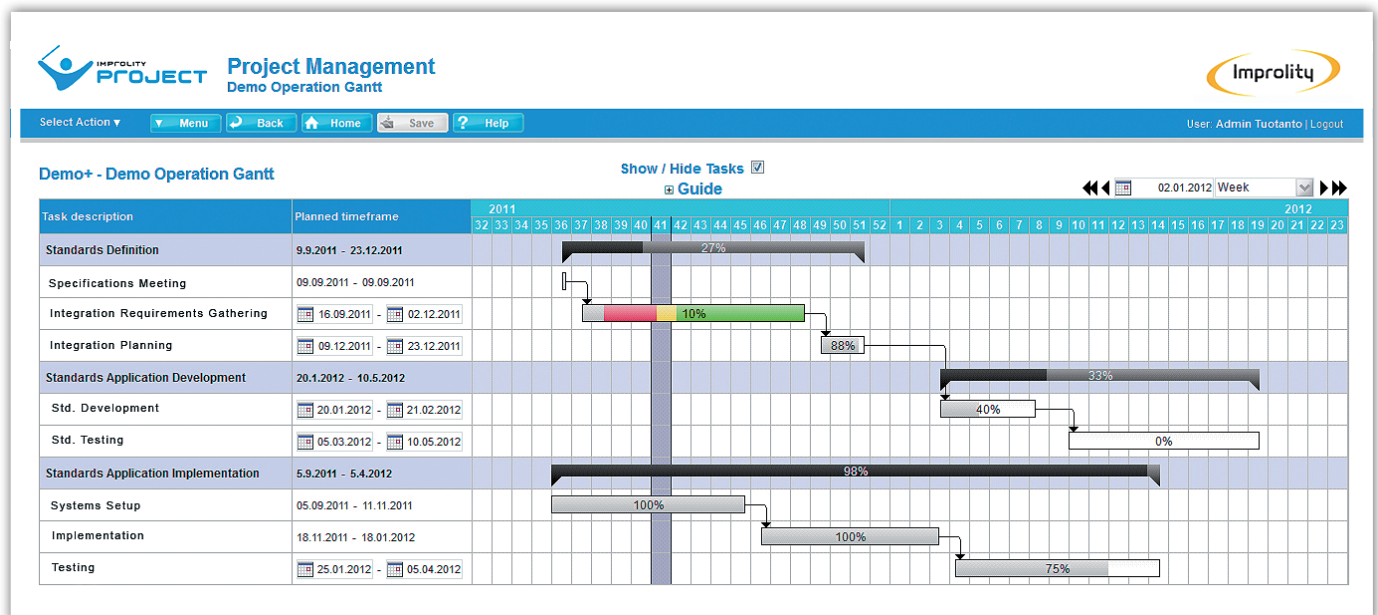

# Individual Project

Resource load -view can be used to show the resource load of project organisation. When an individual or competency is chosen to be responsible for a task then the load can be determined. User is able to choose teams, individuals and competencies and track their load. User can also visualise and plan future tasks from draft projects and easily jump to the desired phase or task to adjust it.

User can also visualise the resource load change if draft projects are started as planned. Based on this information user can then adjust the resource assignments to setup a more realistic plan for the project.

## Features

- Portfolio Management
- Milestones and Gates
- Phases and Tasks
- Gantt Presentation and Task dependencies
- Resource Management
- Hour Reporting
- Budgets, forecasting and realised expenses
- Status Reporting
- Risk Management
- Meeting Minutes
- Conversation log
- Attachments and Links
- Email Reminders
- PDF Summaries
- Integrations to other systems

# Feedback from our customers

## **KONE Corporation**

Kimmo Selin, Vice President, R&D

We developed a portfolio management system for our product development projects that was based on Improliity's project management platform. The system is now globally used in all our product development units, and has made project monitoring and reporting simpler and more efficient. It also enables more versatile and – more importantly – real-time reporting throughout the Group.

Tailoring Improliity's platform to our needs succeeded easily. Improliity operated flexibly and in full cooperation with our project team.

## **Metso IT**

Teppo Ojala, Project Manager

Metso is a global supplier of sustainable technology and services for mining, construction, power generation, automation, recycling and the pulp and paper industries. We have about 29,000 employees in more than 50 countries. Metso IT is an internal service department for Metso Group, providing centralised (typically global) ICT services for all business areas. Our goal was to improve our ICT Project Portfolio management and to clarify transparency of projects across geographical borders. Processes and decision making has been standardised using Improliity's solution. During the process of improving and enhancing our processes we have also been able to provide input and improvements to Improliity's solution. We strive to continuous improvement in Project Management and for now our requirements have been easily met with only small adjustments of the solution.

## **Ministry of Finance**

Tommi Oikarinen

Ministry of Finance, Negotiating Official

KuntaIT (the Local Government IT Management unit) is part of Finland's Ministry of Finance. KuntaIT's main duty is support the Finnish

municipal sector, improving the productivity of the municipalities service production, developing customer based and cross-organisational service processes and planning and implementing the Project to restructure municipalities and services. The KuntaIT projects are made in cooperation with the municipalities. To manage the implementation of KuntaIT's development projects, KuntaIT utilizes a project management method and project office created for its internal use. Toolkit for the management of KuntaIT's project portfolio is Improliity Project. Improliity Project helps KuntaIT project management and it provides a brilliant tool to ensure that the projects proceed on schedule and that they reach their objectives. "We are very pleased for how Improliity Project supports our needs. Improliity Project is really easy to use and it provides extremely good support and platform for our cooperation with municipalities", concludes Tommi Oikarinen of KuntaIT unit.

## **Com. Enterprise MediKes**

Heikki Ihanainen, Director

Medikes is an information and communication services provider for health and social care organisations. Medikes wanted to improve project and portfolio management. One of the central goals was to be able to get a clear view on ongoing projects and their status. Also project goals, deliverables, schedules, costs and resource allocations wanted to be easily accessible. Improliity Project has now been in use for 6 months and it has greatly improved our portfolio management by addressing the issues we wanted to resolve.

## **Mipro Ltd**

Suvi Hyyryläinen, Retail Scheme Manager

Mipro Oy is an engineering company specialising in customised automation. Improliity Project has all features needed but nothing extra, which results in much better usability compared to other solutions in the market.
